

## SFA - BOOSTER COMPRESSOR FOR AIR OR NITROGEN (360-3000m<sup>3</sup>/H)

### Product Description:

Our compressor range is designed for various media, including air and nitrogen (N<sub>2</sub>), ensuring versatility and reliability.

### Key Features:

- **Oil-Free Warranty:** Guaranteed to have zero oil content, fully compliant with the ISO 8573-1 standard for oil-free air.
- **High-Efficiency Design:** Engineered for optimal energy efficiency, reducing energy costs under the same operating conditions.
- **Stable and Low Noise:** The main unit operates with minimal vibration, maintaining noise levels at 80dB(A) for a quieter working environment.
- **Long Maintenance Period:** Capable of running continuously for 6000-8000 hours without interruption, ensuring long intervals between maintenance.
- **Easy Installation:** The skid-mounted design allows for simple installation and enables start, load, unload, and stop functions with a single key.

### Parameters:

- **Inlet Pressure:** 1-16 bar
- **Exhaust Pressure:** 8-150 bar

Our oil-free compressors provide a reliable and efficient solution for your air and nitrogen compression needs, offering ease of use, low maintenance, and compliance with international standards.
